Today is Star Wars Day, and fans of the massive sci-fi franchise are celebrating in many ways. If you want to join the celebration, you can watch almost every Star Wars movie for free this week on Sling TV. Here's how it works: Sling is offering people a way to view their Sling Blue line for free, and without a credit card. That means you can watch over 40 live TV channels on your streaming service from 5 p.m. to midnight EAST Time. This also includes free access to on-demand content for those channels. TBS is part of the Sling Blue lineup, which means you can watch nine of its Star Wars live-action movies from 5 p.m. to midnight, from now until May 10. Just sign up for the free offer via the link below, and then go to the May The Fourth Be With You tape on the On Demand or My TV tab to watch nine of the Star Wars movies during the free time period. The only movies that aren't available to watch for free on Sling TV this week are Solo: A Star Wars Story, which is available for streaming on Netflix, and Star Wars Episode 9: The Rise of Skywalker, which just fell today on Disney Plus. Those lower prices end today. Are you watching free Star Wars movies this week? Tagged: Star WarsSling TV Family Guy is one of the most controversial and divisive shows ever watched on TV. He's parodied everything from Taylor Swift's breakup songs to Louisiana's Purchase. Because Star Wars is so ubiquitous, it has been forged several times. In fact, FamilyMan parodied every film from the original Star Wars trilogy with a full episode of the series. George Lucas has often been aware of the films that played his work. This raises an interesting question: What did Lucas think of The Family Guy Star Wars parodies? Mark Hamill, Carrie Fisher and Harrison Ford Sunset Boulevard/Corbis via Getty Images Did George Lucas think the first 'Star Wars' 'Family Guy' party was fun? The first episode of Family Guys to be a parody of a Star Wars film was Blue Harvest. Harvest Blue Stapos Star Wars: Episode IV – A New Hope. In an interview with Scott Collins of the Los Angeles Times, MacFarlane explained the origin of the episode. MacFarlane recalled The... episode came up because we were doing so many 'Star War' gags that eventually Fox's legal department said, Hey, we have to start cleaning this up with Lucas or we're going to be sued. [T]o our surprise, Lucasfilm said something we never, ever heard, 'OK, you can do it, just make sure the characters look exactly like they do in the movies.' The Griffins COLLECTION of FOX images through Getty Images 'Star Wars': Why did George Lucas decide not to make Darth Maul female how Lucas reacted to all this? MacFarlane said: When the first episode of 'Blue Harvest' was about to air, we were invited to his ranch and sat down and saw him with him. We were halfway there, to say, 'You know what? We can't let this air. But he brought his son, and they were both in him. Collins asked MacFarlane if Lucas ever laughed at Blue Harvest. He laughed a couple of times, yes. He's a very mute guy. Lucas apparently took some trouble with this Dark Side, at least initially. There's a scene on the Dark Side where Chris Griffin tells F'ck you, Dad! Peter Griffin. Lucas was uncomfortable with this joke. According to Syfy, director Dominic Polcino said it took a little persuading to get Lucas on board with this joke and some other spicy material. However, he remained in the final cut of Dark Side. MacFarlane said Lucas' company, Lucasfilm, put some uns specified limitations on the episode. According to CBS News, MacFarlane said, There are limitations, it's still the Star Wars franchise, so Lucasfilm, you know, don't allow everything, but, they allow a lot. They allow Family Father to be a Family Member. Family member is an incredibly controversial show, but Lucas got some entertainment value from him. Lucasfilm put some limitations on the impersonations of a family father galaxy far, far, far away. However, the company mostly allowed the show to retain its signature humor. See also: 6 great reasons New episodes of 'Family Guy' will never surpass the old 'Star Wars' is the closest that cinema has to a unifying faith: no cultural phenomenon has ever inspired such devotion, such passion – for lack of a better term – extreme nerdiness. Even those of us we worship at Skywalker Shrine find our devotion difficult to explain, but we believe a lot of that has to do with characters. They can be heroic or evil, seductive or repulsive, robotic or loving, but they are always memorable. So here, on a wholly personal list, Time Out resident Gonk-geek Tom Huddleston presents the top 50 'Star Wars' characters in order of grandeur. Disney Plus is now live in many parts of the world. If you're a Star Wars fan, there's good news: you can stream all the feature films from the space fantasy series with a Disney Plus subscription. Soon, all Star Wars movies will be on the service. But what Disney Plus Star Wars are the best? Read more: What's new in Disney Plus We'll admit they're massive Star Wars fans. We'll also admit that the quality of Star Wars movies released in theater varies considerably. In addition, many films in franchise have proven to be divisive among fans. For our part, we're just going to examine the movies like, well, just movies. Your opinions about our selections may be different, but that's fine! With that in mind, here are our selections for the best Disney Plus Star Wars movies. Best Disney Plus Star Wars Movies Editor's Note: We'll update this list as more Disney Plus Star Wars movies are added to the service.1. Star Wars Episode IV: A New HopeGeorge Lucas might have thought he was making a children's movie when he thought of Star Wars. In the end, the release of this film in 1977 transcended all genres and ages. In essence, this is a space fantasy story from a farmer, Luke Skywalker, who dreamed of leaving his home for adventure. Lucas' original film has humor, action and suspense. It also had visual effects that were years ahead of any other sci-fi film, making this galactic conflict story even more real for an audience. This version of A New Hope is the 1997 Special Edition version with new unwanted and distracted effects and sequences. Despite this, and also the new Macklunkey edition of han Solo-Greedo's shooting, it remains an all-time classic.2. Star Wars Episode V: The Empire Strikes BackThe Empire Strikes Back was the most anticipated movie sequel ever released at the time. The 1980 film, directed by Irvin Kershner, still has some memorable sequences. These include the battle in the ice world Hoth, and Luke's first direct battle with Darth Vader, which concludes with perhaps one of the greatest plot twists in film history. It's also got a pretty bleak ending for a space fantasy movie. All these features and more made The Empire Strikes Back stand out from the crowd, and it's easily one of the best Star Wars movies on Disney Plus.Again, this is the Special Edition version of the movie, although this time the new visual effects aren't that annoying.3. Star Wars Episode V: The Return of the JediThe third and final film in the original Star Wars trilogy did not have the impact of the first two films. However, the 1983 release, directed by Richard Marquand, still ended the story very successfully. He also introduced us to Jabba the Hutt and the emperor's first full appearance, the true bad guy in the trilogy. We also have an epic lightsaen duel between Luke and Vader, a massive space battle and a swashbuckling fight on a sail barge. There's also the battle on the Moon Endor involving the little furry Ewoks, who still have mixed feelings. We will point out once again that this is the Special Edition version Return of the Jedi. There are some new images in Jabba Palace, and most importantly some scenes added in the end.4. Rogue One: A Star Wars StoryWith this 2016 release, you'll finally be able to see some of the story unreleased behind the Star Wars universe in a live action movie. This is a cruder version of space franchise, with a cast of characters joining together to secure the plans of the Empire's first Death Star. That includes Jyn Erso, the daughter of the man who designed the spherical space station. We can also see Darth Vader as we have never seen him as a truly powerful agent of the Emperor before. It all ends in a great battle in space and on planet Scarif. Rogue One is the kind of Star Wars movie we want to see more after The Skywalker Saga is complete.5. Star Wars Episode VII: The Force AwakensDisney purchased LucasFilm in 2012. Three years later, fans finally got what they wanted for so long: an official continuation of the saga that showed the events that followed at the end of Return of the Jedi. Co-writer and director J.J. Abrams created a film that added new characters to the mix, including the mysterious King, and a cute new droid named BB-8. We also have some returning favorites, including an aging Han Solo but still with quick wit. Many critics have since felt that this film was basically a remake of A New Hope. For our money, there were enough new plot twists and character development to make this film stand out. That includes the death of a beloved character, so bring your handkerchiefs.6. Star Wars Episode VIII: The Last JediThe second part of the new trilogy has definitely generated some debate among Star Wars fans. Screenwriter and director Rian Johnson definitely took the film in directions that most fans didn't see coming. For our part, The Last Jedi is uneven, but it still has some of the best scenes from the sequel trilogy. Oh, and the tissues will have to come back again.7. Star Wars Episode III: Revenge of the SithThis is easily the best prequel film in the Star Wars trilogy. The 2005 film was the first Star Wars film to be rated PG-13, and is noted. He gets into a more mature subject, as the Sith's final plans manifest themselves. We also have perhaps the greatest lightsaby battle of all time between Obi-Wan Kenobi and Anakin Skywalker. The film still suffers from too many digital effects for some people's taste, but it is a good movie overall however.8. Star Wars Episode II: Attack of the ClonesAttack clones introduces us to Hayden Christensen as the oldest Anakin Skywalker. His performance can be extremely strides, but it fits the overall style of the film. It's a little hard to understand why Natalie Portman's Padmé Amidala would fall in love with the guy, even if he's a Jedi. The clone attack still has some nice sequences, including a final battle between the clones and the droid army. We can also see Christopher Lee for the first time as Count Dooku, who is in this role.9. Star Wars Episode I: The Ghost Boy of the Threat. The 1999 release of The Phantom Menace was something all Star Wars fans were eager to see. He also made a lot of money, which meant that screenwriter and director George Lucas could complete this prequel trilogy. Unfortunately, this film was a disaster almost from the beginning. The Disturbing Trade Federation were horrible, Jake Lloyd is a bit of a cringey like Anakin, and CGI character Jar Jar Binks remains one of the biggest mistakes in the franchise. Fortunately, we have the exciting podrace in the middle and a huge lightsa saber battle at the end. Liam Neeson is great as Qui-Gon Jinn and Ewan McGregor were the perfect choice to fill Alec Guinness shoes like Obi-Wan Kenobi.10. Solo: A bad Star WarsAs story like The Phantom Threat is, at least there are some entertaining parts of that movie. This is not the case with this 2018 film. He is more famous for what happened behind the scenes, as original directors Phil Lord and Christopher Miller were fired after filming most of the film. Ron Howard stepped in to re-shoot and finish the film. However, what we get here is boring, from one step to a good place. Seeing Han Solo's early life is a good idea for a movie. Unfortunately, what we get here is a boring space opera. At least we have Donald Glover's performance as Lando, but it's not enough to save this snoozefest. While the last trilogy began well

with The Force Awakens, the second film, the second film, The Last Jedi, was definitely uneven. That didn't prepare us for this mess of a final movie. It really looks like director J.J. Abrams used a dart board to choose which plot points he would use to complete the stories. In the end, we get the return of Admiral Palpatine, a search for a plot, many of the products of the original trilogy and a final battle that is supposed to be epic, but turns out to be a huge disaster. It's a very poor way to end the long Skywalker saga. Honorable mention Disney Plus Star Wars movie: Empire of Dreams For true fans of the original Star Wars trilogy, this two-and-a-half-hour documentary is a must. Made in 2004, it goes into heavy details about the manufacture of A New Hope, The Empire Strikes Back, and Return of the Jedi. It also has a lot of behind-the-scenes images and new interviews with the cast and the film crew. Those are the best Star Wars movies on Disney Plus right now! We'll update this list as more movies arrive at Disney's streaming service. Service.
